

UTELITE FEATURED LANDSCAPE ARCHITECT

In-Site Design Group is a full service landscape architecture and land planning firm located in American Fork, UT. They are licensed and offer their services in Utah, Idaho, Nevada, Wyoming, North Dakota and Oregon. Their Landscape Architects and Designers have many years of experience in the commercial and residential landscape and planning industries including master planning, open space and park design, planting and irrigation design, construction documents, client representation at public meetings and presentations, illustrative renderings, construction management and contract administration.

Their experience in landscape construction gives them the practical knowledge necessary to develop functional and cost effective landscape architectural designs. Through their experience and the utilization of the latest design and drafting software, their team is able to provide innovative, practical and realistic services to their clients.

“In-Site Design Group has specified Utelite’s soil products on many projects ranging from schools to religious intuitions to rooftop gardens and streetscape projects. Utelite’s products are a great amendment especially for Utah soils or where lightweight media is a must. Utelite’s products have added great value to projects we have designed.” Cory Whiting - Owner
